Installation Plates  
Shield Plates

## Installation Plate

The Idesco® Installation Plate is injection moulded and has perforated holes for all Idesco® reader mounting. The installation plate is useful for covering socket holes when using a mullion type reader, provides more space for connections and also helps ensure reliable reading when multifunction cards are scanned. This additional space is particularly important when readers are installed upon metal surfaces.

<b>Dimensions (hxwxh)</b>	
Installation plate small	140 x 49 x 10 mm
Installation plate large	170 x 80 x 10 mm
<b>Plate material</b>	Plastic
<b>Colour</b>	Matte black
<b>For housings</b>	Pin, Basic, Slim, Slim Pin
	Dedicated back plates available for Quattro housings with connector / without connector

## Shield Plate

The Idesco® Shield Plate is designed for installations where two RFID readers are to be situated on opposite sides to one another, for example on both sides of a door frame or wall. In such close proximity the RF fields of the readers can interfere with the stability of each others signal, causing unreliable reading performance. The Idesco® Shield Plate eliminates such interference. Idesco® Shield Plates may be used with the majority of Idesco's products. They are available in three sizes: Basic, Pin and Quattro.

<b>Dimensions (hxwxh)</b>	
Basic	52 x 118 x 1 mm
Pin	52 x 147 x 1 mm
Quattro	93 x 93 x 1 mm
<b>Plate Material</b>	Aluminum
<b>Colour</b>	Matte black
